III. MARKET UPDATE DURING THE PERIOD

1. Macroeconomics

GDP in Q2/2025 recorded impressive growth with stable inflation, despite the tariff storm

Vietnam's GDP in Q2/2025 was estimated to grow by 7.96% year-over-year, only slightly lower than the 8.56% growth in Q2/2022 – the highest quarterly rate from 2020 to 2025. Overall, the GDP for the first 6 months of 2025 increased by 7.52% year-over-year, marking the highest H1 growth rate since 2011.

The Consumer Price Index (CPI) in the first half rose by 3.27% year-over-year, while core inflation increased by 3.16% year-over-year. Notably, transportation prices fell by 3.63%, primarily due to a 12.56% drop in fuel prices, which helped restrain overall CPI growth.

-

Trade balance begins to feel the impact of tariffs

In first half of 2025, total import-export turnover reached USD 432.03 billion, in which exports increased 14.4% and imports increased 17.9%. The trade surplus stood at USD 7.63 billion, decreased 34.3% year-over-year.

Import-export situation in early 2025 was negatively affected by tariff policies introduced under Trump's presidency, leading to a marked decline in the trade balance. However, both exports and imports still maintained double-digit growth, mainly driven by accelerated exports to countries with free trade agreements and a push to ship goods to the U.S. during the grace period ahead of pending tariff negotiations. Foreign direct investment (FDI) enterprises continued to dominate, contributing over 70% of total exports. The U.S. remained the largest export market, increased 28.2% year-over-year, while China was the top import source, increased 26.4% year-over-year.

FDI inflows remain strong

In first half of 2025, Vietnam attracted USD 21.52 billion in registered FDI, an increase of 32.6% year-over-year. Disbursed FDI reached USD 11.72 billion, up 8.1% year-over-year, marking the highest disbursed level in the past 5 years. The manufacturing and processing sector accounted for 81.6% of total disbursed FDI, mainly sourced from Singapore and China.

Credit growth surges significantly

As of 30 June 2025, total outstanding credit of the banking system exceeded VND 17.2 quadrillion, up 9.9% from end of 2024 and 19.32% year-over-year, marking the highest credit growth in recent years.

V. MARKET OUTLOOK

1. Market Outlook

GDP targets 8% growth

Vietnam's GDP grew impressively by 7.96% year-over-year in Q2/2025, marking the strongest first-half performance in over a decade. However, achieving the full-year growth target of 8% will require further acceleration, especially amid ongoing global tariff uncertainties. To meet this goal, stronger public investment disbursement—particularly in key infrastructure projects-is essential.

Stock market upgrade approaching

Vietnam has fully met the criteria for upgrading as reforms in the legal framework and foreign ownership limit are nearing completion. A potential upgrade from frontier to emerging market status in the near future could attract a significant wave of foreign investment. This would serve as a short-term psychological boost for investors and help improve market liquidity and valuations in the long term.

2. Fund's Operations Plan

The fund plans to maintain an average equity exposure, supported by continued monetary easing policies that are expected to boost corporate earnings.

The fund will prioritize holding stocks that benefit from strong domestic economic momentum, including Banking, Public Investment, Retail, as well as Securities stocks, which are well-positioned for the anticipated market upgrade.

In the short term, the fund will closely monitor U.S. tariff information and adopt a wait-and-see approach toward export-related sectors and industrial real estate until the global trade policy outlook becomes clearer.
